

## Annual Professional Development Statement 2010

Name: EXAMPLE

Membership Number: EXAMPLE

### Professional Development Goals

To keep up to date with changing technology, regulations, standards etc within my area of offshore pipeline engineering.

### Activity Log

Date	Activity	Learning objectives (What did you learn, how will you apply this?)
24 – 26 April 2010	Australian offshore Oil and Gas Conference & Exhibition, Perth WA	I discovered some new equipment, materials and service providers within my area of work and this assists me when dealing with the facility operators I regulate. I also had the opportunity to network with various industry specialists, making contacts that may be useful in the future.
Dec 2009	Successfully attended Certification IV Government course and assessment	Mandatory Australian accredited course relating to regulatory duties of offshore Inspectors. I learned about Australian offshore law and its application to inspection and investigations of offshore facilities.
Dec 09 – April 10	Writing technical notes, assessment aids, inspection guidance etc relevant to offshore pipeline integrity for non pipeline discipline work colleagues as mentor.	I learned some teaching methods and varied the presentations to ensure understanding from the varied recipients.
Dec 09 – April 10	I am employed as a specialist pipeline inspector for the National Offshore Petroleum Safety Authority of the Australian Government. I undertake assessment of Safety Cases for the various stages in life of offshore facilities. I also inspect offshore facilities to ensure compliance with the Safety Case	To enable me to competently assess these safety cases I need to be up to date with current legislation, materials, codes, standards, work methods and equipment. I also need to offer advice to operators to ensure they maintain their asset integrity and reduce all risks to ALARP.
Oct 09	Flexible pipeline Seminar Aberdeen	I learned from other International Regulators and offshore Oil and Gas Operators their experiences and failures relating to flexible flow-lines. A workshop discussed inspection techniques and operational issues.
Sept 09	Jee Subsea pipeline Course Aberdeen	Update on subsea pipeline construction, operation and integrity
23 – 24 June 09	Attended the IGEM Engineering Update Seminar (CPD event)	Object to update engineers to a wide range of topics relating to the gas industry both upstream and downstream. Of particular interest was LNG developments upstream

		which are relevant to my work in Australia.
18 Feb 09	IGEM Leadership Lecture London (CPD Event)	Learned about leading from the top, motivational methods and how I can encourage other to do the same.
Currently	Accredited as competent to undertake Professional Review Interviews for Chartered Engineers, Incorporated Engineers and Engineering Technicians and act as an assessor and scrutineer for IGEM	Learned the requirements of the Institution of Gas Engineers and Managers for admission to the membership grades, plus techniques and experience of interview and mentoring activities.
